

Product: Datalogic JET

Product Bulletin Number: PBDLM-080905

Distribution Date: September 5th, 2008

Global Positioning System technology inside the Datalogic JET.

Datalogic Mobile is pleased to announce that the Datalogic JET has been enhanced with the integrated Global Positioning System (GPS) technology. No external antenna will be added saving the great ergonomics and the same high robustness level.

Combined with its advanced wireless and data collection technologies, the result is a single comprehensive mobile solution that eliminates the need for deploying multiple devices to the field.

Main technical features:

- ✦ 20 channel all-in-view tracking
- ✦ tracking sensitivity -159dBm
- ✦ cold start: ~ 2 minutes
- ✦ warm start: ~ 30 seconds
- ✦ hot start: ~ 10 seconds
- ✦ accuracy: ~ 5 m

This new feature is provided together with Bluetooth, 802.11 b/g Cisco CCX V4 certified and GSM/GPRS module, miniaturized laser as engine option.
