Genuine Zebra® Mobile Accessories

Enhance your mobile printing solution with Genuine Zebra Accessories.

Zebra mobile printers add efficiency and convenience to a variety of applications. When you complement them with Zebra mobile accessories, you can maximize the benefit of your mobile printing solution. From chargers to cases, you'll find Zebra quality in everything we offer.

Accessories for Zebra Mobile Printers

Zebra offers a variety of chargers and batteries, cases and boots, cables and radios, and carts and mounts to meet the needs of multiple applications. Use Zebra accessories to add to the convenience, durability, and efficiency of your mobile printing applications. Ask your sales representative for more details on accessories for your printer.

Power Management

Efficient power management for your mobile printer.

QL Series and TR 220 (PGP 1000) Lithium Ion Batteries

Lithium-ion (Li-Ion) cells represent the latest in mobile battery technology. They offer higher power-to-volume and power-to-weight than their nickel metal hydride and nickel cadmium counterparts. Zebra utilizes Li-Ion technology in its newer QL series and TR 220 printers.

PRINTER BATTERY	AMPERE-HOURS	VOLTAGE
QL 220	≥ 2.1	7.4
QL 320	≥ 2.1	7.4
QL 420	≥ 4.2	7.4
TR 220 (PGP 1000)	≥ 1.9	7.5

Cameo and Encore Series Nickel Metal Hydride Batteries

Nickel metal hydride (NiMH) battery technology was chosen for the Cameo and Encore printer lines because they efficiently supply the widely variable power requirements of thermal printers. NiMH batteries offer a higher energy density (favorable ratio of capacity to size) than NiCds.

PRINTER BATTERY	AMPERE-HOURS	VOLTAGE
Cameo 3, 3N, or 3SC	≥ 1.6	7.2
Cameo 2 or 2SC	≥ 1.6	7.2
Encore 2	≥ 1.6	7.2
Encore 3 or 3N	≥ 1.6	7.2
Encore 4 or 4SE	≥ 2.2	7.2

PA/PT Series Nickel Cadmium Batteries

Nickel cadmium (NiCd) cells have been used in mobile printers for many years and offer high power battery technology. Zebra utilizes NiCd technology in its PA and PT series of mobile printers.

PRINTER	AMPERE-HOURS	VOLTAGE
PA/PT Series Standard Battery	0.7	14.4
PA/PT Series Extended Life Battery	1.4	13.2

QL Series and TR 220 (PGP 1000) Lithium-Ion Chargers

QL 220/QL 320/QL 420
Fast Charger: Charges a single QL series Li-Ion battery at a time in approximately 2–5 hours.

Quad Charger: Charges up to 4 QL series Li-Ion batteries at a time in approximately 2–5 hours.

TR 220 (PGP 1000)
Single Bay Charger: Charges a TR 220 (PGP 1000) battery in about 4 hours.

Cameo and Encore Series Nickel Metal Hydride Chargers

Cameo/Encore Series Chargers
Fast Charger: Charges a single Cameo or Encore series NiMH battery at a time in approximately 2–3 hours.

Quad Charger: Charges up to 4 Cameo or Encore series NiMH batteries at a time in approximately 2–3 hours.

PA/PT Series Nickel Cadmium Chargers

PA/PT Series Chargers
Universal Charger (and power cord): This brick charger comes with a separate cord for customization to international requirements. The universal charger charges PA/PT batteries while in the printer in approximately 2.5 hours.

Multiple Charger
　Base Kit: Order the external battery charger base kit to charge one PA/PT battery in about 2.5 hours while replacing the battery in the printer with a charged spare.

　Additional Charging Station Module: Up to 4 additional charging stations can be attached to the base kit for charging up to 5 PA/PT batteries at one time.

120VAC: This basic charger can be ordered for US applications to charge a PA/PT battery in 2.5 hours.

PS 2100 Series' Terminal and System Batteries

The PS 2100 series features a dual battery design. Lithium-ion battery technology is used for the control module, and the system base utilizes nickel metal hydride battery technology. If a replacement is needed during the product's lifecycle, it can be ordered with the part numbers below.

BATTERY	AMPERE-HOURS	VOLTAGE
System	8	7.4
PS 2100T Control Module	2	7.2

Bluetooth®/Zebra Portable Radio (ZPR)

Add the Bluetooth option to your Zebra mobile printer and you can communicate with one or more computers (e.g. PDAs, PCs) enabled by a Compact Flash (CF) card or embedded Bluetooth radio chip. For Symbol® terminal users, it's as easy as clipping on a Zebra Portable Radio (ZPR) with Bluetooth!

Zebra Portable Radios clip onto Symbol SPT 1700/1800 or PPT 2700/2800 to add Bluetooth functionality, for communicating to your Bluetooth-enabled Zebra mobile printer.

Bluetooth radios can be configured in the Zebra Cameo®, Encore® and QL™ series printers.
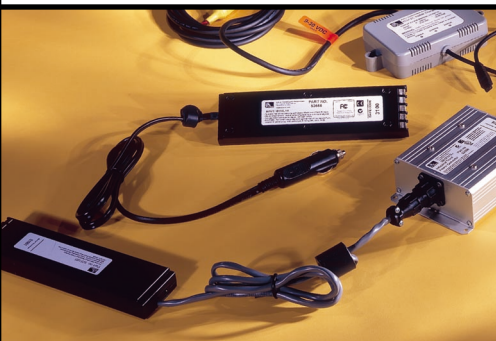

QuickLink™ Modules

The QL series' QuickLink modules offer the flexibility to adjust to a wide range of connectivity needs with built-in secure encryption. As needs change, so can QuickLink modules.

802.11b: The latest and greatest WLAN connectivity (Symbol Compact Flash or Cisco® PCMCIA).

Bluetooth: Add mobile printing to your work group or piconet.

Cable-ready: Not ready for wireless? Select from cables to connect to a wider variety of terminals than any other mobile printer vendor.

Vehicle Power Supplies

You won't have to worry about keeping a charge on the road with Zebra vehicle power supplies.

Cameo/Encore Series
Charge your printer while on the road with the trickle charge vehicle adapter, which charges Cameo/Encore NiMH batteries in about 10–14 hours.

QL Series
Use the QL series running charger in your vehicle to maintain a charge while en route.

PA/PT Series
Plug the PA/PT vehicle power adapter into your cigarette lighter or connect directly to your battery with our high power DC/DC converter, thus eliminating the need for a battery.

Cables

Zebra printers offer flexible wireless and wired connectivity. Our selection of cables meets the needs of mobile users to connect with the most popular handhelds and scanners on the market. As new terminals are introduced, Zebra adds new cables to keep options open for our mobile printer users.

PA/PT Cables: Zebra offers a variety of cables to connect from the PA/PT RJ-45 connection to your handheld unit.

Cameo/Encore/QL Series Cables: For our 8 pin DIN printers, Zebra offers a variety of cables to match the pin outs of your data collection device.

Wireless LAN Options

Zebra mobile printers offer the latest in wireless connectivity, from Bluetooth to 802.11 to 802.11b wireless LAN. Configure your printers with these wireless options today, or purchase a QL series printer and upgrade to wireless connectivity later.

802.11 Wireless LAN: Purchase the QL 320, QL 420, Cameo 3N receipt printer or Encore 3N label printer for your 802.11 wireless printing needs.

802.11b Wireless LAN (Symbol Compact Flash or Cisco PCMCIA): QL series printers offer the latest connectivity trends today and are flexible enough to offer a migration path for when future standards are developed. PS 2100 series transportable printers offer integrated 802.11b radios for communication to the central server.

Handling Options

Enhance the convenience of your mobile printer.

WEARABLE

Cases

Add dust and rain protection to your mobile printer with an environmental case. By adding an extra layer of protection, your printer will be well prepared for the harshest environmental conditions. Cases are available for the:

- Cameo series
- Encore series
- QL series

Boots

Expand the impact resistance of your mobile printer by adding a boot. The rubber boots can be put on Zebra Cameo and Encore mobile printers for heavy-duty environments.

QL series and PA/PT series printers come standard with rubber-infused housings for extra ruggedness

Holsters

Add to the convenience of your TR 220 (PGP 1000) by providing users with a holster to wear when the printer is not in use. The holster comes standard with a shoulder strap, waist strap, and leg strap, to meet the comfort needs of any user. By adding a holster, the TR 220 (PGP 1000) can be tucked away to free the hands for other aspects of the application.

MOUNTABLE

Vehicle Mounts

Using Zebra vehicle mounting kits, users can place a mount in their forklift or truck to provide convenient storage for their mobile printer while on the move. Mobile mounts are available for the PA/PT series, QL 420, and Encore 4. Fanfold media bins are included in the mount kits for the QL 420 and PA/PT.

PS 2100 Series Carts

The PS 2100 series of transportable printers integrates up to 2 printers and a control module into one unit. This system can be mounted to a retail shopping cart or to a 5-wheel utility cart to roll printing functionality throughout your operation.

Cart options

Shopping Cart Mounting Kit: This kit allows retailers to add the transportable functionality of the PS 2100 series to their operation by using their own carts.

5-Wheel Utility Cart: The 5-wheel utility cart offers users a simple way to put their printer on wheels.

QL Stand

Users of the QL series of mobile printers can purchase a resting spot for their printer while not in use. These convenient printer stands also are a useful spot to place the printer while toggling through options or programming the printer. These stands are designed to accommodate any QL series mobile printer.

QL printers also can be configured with a kickstand option, as can be seen above on the QL 220, which props the printer on a flat surface. The kickstand flips upward for use as a carrying handle.
